

Dear Patient,

We would like to take this time to let you know how proud we are to now call you our patient. It gives us great pride to know we are able to make a difference in our patient's lives and in their health. You should also pride yourself as well. Many people choose medication to alleviate pain or symptoms, but do not deal with the underlying cause. This is why chiropractic, along with exercise, diet, and nutrition, all together is so important. We deal with the cause of the pain and symptoms without covering it up with medications. It is our hope that we may continue helping people in such a natural way. You can rest assured that you have placed yourself in good hands.

This folder is customized just for you. In it, you will find informative tab sheets on each of the supplements you are taking. If you should ever have any questions feel free to call Jessica or Jean. If we don't have the answer, we will get it for you. Or if you prefer, you can email us at schippelchiropractic@yahoo.com.

Here's to maintaining good health for years to come ... and your health is our priority!!

Annette Kutz Schippel, DC
Jessica Withee, Office Manager/Assistant
